		ACCESS			ZONE <b>133</b>

Perform a detail visual inspection of the control cables within the left main landing gear wheel well for broken wires. Check associated pulleys, brackets, and mechanisms for condition and security of installation. The following cables are located in the left MLG wheel well:

- A. Aileron control cables
- B. Spoiler control cables
- C. Speed brake control cables

Note: The control cables must be displaced full travel in each direction for complete inspection at seals, pulleys, and fairlead areas.

**INTERVAL NOTE:** Whichever occurs first.

TASK CARDS

A diagram of a yellow aircraft with a blue box labeled 'A' pointing to a pink oval on the fuselage. The aircraft is shown from a side profile, with dashed lines indicating its outline. The pink oval is located on the side of the fuselage, near the wing. The blue box 'A' is positioned above the oval, with a line pointing to it.
